

***STARS is both a complete QRIS data system and an array of consulting services to meet the unique needs of your QRIS initiative.***

**stars**  
COMPREHENSIVE QRIS SOLUTION

## Technology for QRIS beyond STAR Ratings

- The most complete QRIS data system on the market
- Being used in 4 states with more than 20,000 programs
- Consulting services for the success of your QRIS beyond data system
- A holistic solution to support continuous quality improvement (CQI)

Mosaic's Comprehensive QRIS Solution, STARS, is both a proven QRIS data system and an array of consulting services. Our data system is based on a robust web-based data collection, management, and reporting platform designed to manage all aspects of QRIS workflow. Our consulting services include strategic consultation, IT services, applied evaluation and research, and data analysis and results communication. As a whole, our solution is designed to help initiative leaders successfully plan, implement, and manage the complex needs of QRIS for the success of their statewide and regional QRIS initiatives.

*An evidence supported Kindergarten Entry Assessment (KEA) based on teacher ratings developed through a university-community collaborative partnership*

# KSEP

## Kindergarten Student Entrance Profile

- Validated to predict 3rd Grade reading and math achievement at kindergarten entry
- Brief teacher rating tool using naturalistic classroom observations
- Coaching on developmentally appropriate classroom interventions
- Data-driven web portal and mobile application

*In Partnership with*

The Gevirtz School  
Graduate School of Education

UC SANTA BARBARA  
UNIVERSITY OF CALIFORNIA

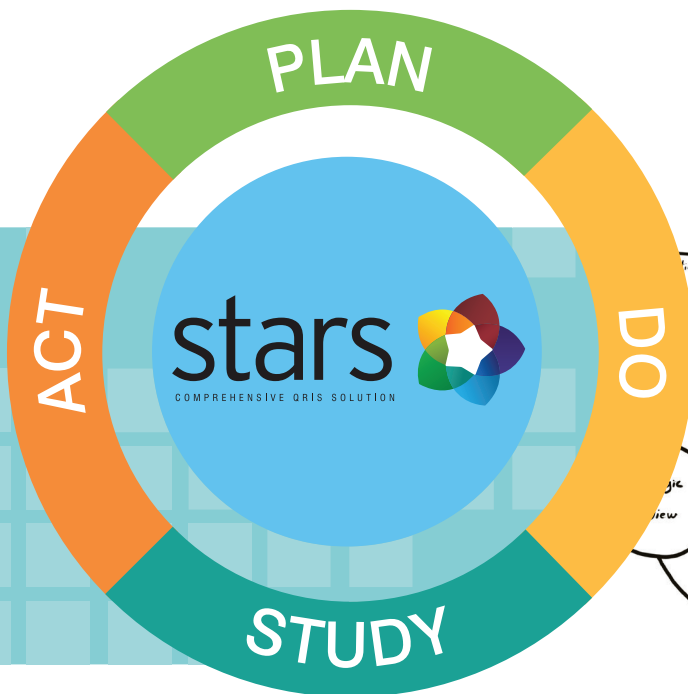

KSEP is a powerful predictor of students' academic achievement in the critical early elementary school years. KSEP is a 13-item teacher rating tool that assesses students' social-emotional readiness and school-ready knowledge, and identifies students who may be at risk of later academic problems. Mosaic's comprehensive services support school staff and state level policy makers from the pilot phase to state-wide KEA implementation. These services along with the KSEP web-portal and the KSEP Mobile App enable communities to establish KSEP ratings as an indicator of school readiness and implement targeted interventions for children's school success.

*Mosaic's subject matter experts will partner with you in enhancing your QRIS workflow using a Continuous Quality Improvement (CQI) approach*

# CQI

## Think Beyond Quality using Mosaic's CQI Approach

- Holistic approach to early childhood program improvement and professional development
- Our ECE experts will partner with you to link program quality ratings to outcomes
- Our evaluation and data analysis team will illuminate risks and best practices in your region

States can improve upon QRIS by making connections across numerous program areas and supports that impact child and family outcomes. The use of multiple benchmarks and indicators can inform progress along the continuum of continuous quality improvement (CQI). Mosaic's STARS QRIS technology platform can be configured to make use of CQI tools much like data integration across agencies. CQI is about improving workflow processes to create an environment where an organization is constantly improving quality. Creating a feedback loop that involves a plan, implementation, reflection and correction enhances information management, tracking and documentation for greater efficiency.

*Enhance your QRIS parent engagement component through our online program self-assessments, action plans, and Protective Factors surveys*

# Strengthening Families

## Integrate Protective Factors into your QRIS

- Align your QRIS parent engagement component with the Protective Factors framework
- Use our self-assessments and surveys to develop program improvement action plans
- Integrate the Strengthening Families framework with QRIS ratings in our STARS data system

Using the Center for the Study of Social Policy's (CSSP) Strengthening Families Approach, more than 30 states are shifting policy, funding and training to help programs working with children and families build protective factors. Many states also use the Protective Factors Framework to assess Parent Engagement in their QRIS ratings. CSSP has partnered with Mosaic to create an online suite of tools to support programs and jurisdictions that are implementing Strengthening Families. These tools and our services for integrating them into your QRIS framework include a program self-assessment with an action plans, the Protective Factors Survey, a staff survey, and results communication.
